Reasons for Allowance

1. An initial rejection was given on claim 1. This rejection was later dropped. The Examiner notes that though the use of IKE(Internet Key Exchange) and IPsec authentication, are well known protocols in the art, there is no sufficient motivation to render the combination as set forth in Applicant's claims. The closest art that has been found are the RFC protocols 2402, 2367, 2407, 2401. The RFC's, otherwise known as the request for comments disclose how each of the various protocols are related and suggests how the use of one protocol may be combined with another. The mere suggestion or even explicitly written combination of one protocol with another however does not provide sufficient support for a rejection for physical context of the application between the mobile terminal, access point, and server. For this reason, the rejections of claims 1-11 were withdrawn.
